GLARE REDUCTION

Introducing **PlexShade**, the latest addition to Johnson Window Films' already impressive automotive portfolio. PlexShade 10% (PX10), is a special application window film which allows installers to apply film on plastic surfaces.

This two-ply dyed construction film offers the same solar properties as our standard window films. It's perfect for motorcycles, caravans, and any off-road and farm vehicles made with plexiglass windows. PlexShade is available in standard automotive film sizes.

Contact your Johnson Window Film specialist for pricing and availability.
